-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

This application contains claims directed to the following patentably distinct species:

Species I, drawn to an identification line, identification cells, a memory circuit, and a memory element (for example, as presently disclosed in claims 1-34);

Species II, drawn to a group of data lines, an identification line, and identification cells (for example, as presently disclosed in claims 35-39);

Species III, drawn to input pads, an identification line, and finger portions (for example, as presently disclosed in claims 40-42);

Species IV, drawn to data lines, means for responding to signals (a memory circuit), and means for storing the enabling value (a memory element) (for example, as presently disclosed in claims 44-47 and 49);

Species V, drawn to receiving a program signal (identification line), receiving enabling signals (identification line), responding to the received enabling signals (memory circuit), and storing the enabling value (memory element) (for example, as presently disclosed in claims 50-55);

Species VI, drawn to receiving a read signal (data line), receiving an enabling signal (identification line), responding to the received enabling signals (memory circuit), and storing the enabling signals (memory element) (for example, as presently disclosed in claims 56-60); and

Species VII, drawn to an identification line, a plurality of cells, a memory, a first switch, and a second switch (for example, as presently disclosed in claims 61-68).

The species are independent or distinct because each species is distinct and requires a burdensome search.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, none are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species.
MPEP § 809.02(a).
